

Why Skytel?

Experience and Expertise

With 30+ years in the telecom industry we have the experience you can count on.

Product Suite

We offer Hosted PBX, unified communications (UC), Mobile integration; SIP Trunks, Call Reporting, Call Recording, Internet Access, CRM integration and more.

Simplicity and Flexibility

From 1 to 1,000 phones, single-site or multi-locations; local, nationwide or worldwide, we have a platform that fits small, medium and enterprise.

Professional Support

Our business class VoIP solution is fully hosted and managed by our professional team. We offer 24/7 remote support from our in-house engineers, and onsite service during business hours.

Onsite Install and Training

Our team of professionals provide onsite installation and training to ensure a smooth on-boarding process. Most providers ship the phones and you have to install them.

Skytel is a company of telephone enthusiasts who are continuously looking for ways that help our customers communicate better with their customers, partners, and suppliers. We provide the phone, faxing, SMS and cellular services that help you succeed.
